11/29/2019 00:14	Incident Log Restored: Williams to bring another portabel FW pump and set up at JWWTP due to the fact that 6G-245 FW pump is leaking oil and may shut down		
11/29/2019 05:01	Incident Log Restored: Truck hit a 12" line - checking on injuries.		
11/29/2019 05:18	Incident Log Restored: 12" supply line to pumper across 136 was struck by neighboring facility employee. CRI escalated to UC. JCOEM contacted to investigate whether neighboring facility employee was already within the zone leaving work or exterior to the zone and reporting to work. The line was split and pumper 35 lost supply. Working to replace the supply line and establish flow to the pumper.		
11/29/2019 05:18	CRI - 12" supply line to pumper across 136 was struck by neighboring facility employee. CRI escalated to UC. JCOEM contacted to investigate whether neighboring facility employee was already within the zone leaving work or exterior to the zone and reporting to work. The line was split and pumper 35 lost supply. Working to replace the supply line and establish flow to the pumper.		
11/29/2019 05:35	Incident Log Restored: 0530 Operation Update: command change 1:30am – Huntsman is starting a turnaround and contract parking is to be used. Barricade was requested. Effort to bring generator on site for chiller. JWW is up and functional. Supporting FW at JWW. 6G245 has an oil leak and Williams pump is staged and on standby with safety features. Successful KCS train run this morning (Motiva coke). A return run is expected between 9-8am. A 2am PAR, by 2:04am 100% accountability. Will give information to PIC. A fuel hose order was received but was incorrect site. Correct size was dropped off at main gate. 6 foam totes at gate 15 that have been used with various levels. Will have to calculate amount of foam used. Fire update: 9 identifiable fires in the facility. 3 are being process fed (head pressure etc.). The other 6 are lazy non-methodical type fires (vapor supplied, etc) could be long term issues. Most of the fires are in the BLK10 area. 2 left in block 5. After daylight will begin isolation plan. Fire water status: 8,000gpm FW from south; 3,000 gpm on chlorine; 4,000 gpm from 4th st to BLK 10; 4,000 off 4th st into BLK10. This was update before 12" line was hit - about 8,000gpm loss. Discussion of water to chlorine and moving cylinders. At 8am – Holley will return and discussion about work/rest time. Conversation about evacuation lift and firewater lines across 136 and 366 and that a path forward will be needed.		
11/29/2019 06:02	Incident Log Restored: 0600 Operations briefing: Review information - No CRI's in the last 24 hours; 12" firewater line hit. Situation briefing - see 0530 update below. Re-establish plan in place for 12" line. Traffic issue will be resolved. Safety/Medical plans - no change/approved. Liason - deployed additional resources - Resolute. 10 people to address oil sheen. 30 people today. Additional boom set out before sun down. Addressing the oil sheen and hope to get that resolved today. JWW in operation - pumping 5000gpm to JWW. Not determined a time to increase flow; have to make sure that JWW ops is stable. Will check to see if we can increase flow later. Aquadam onsite to design a temporary storage solution on our property and to get installed as quickly as we can. Air Monitoring summary - no action levels exceeded except for issues with the fog and particulate matter. Need to review data. Safety - working on severe weather plan and additional water accumulation. working on asbestos IH plan. No logistics update. Ship traffic - fog effecting ship traffic. Won't let traffic go through flume. Will have to update later.
